Turki Ali Almalki

Riyadh • 0550866000 • turkialmalki.com • linkedin.com/in/turki-almalki • turkialmalki202200@gmail.com

Engineering Leader with 9 years of experience leading cross-functional engineering teams in fintech and digital products, delivering scalable web and mobile platforms across banking and government sectors. Experienced in system architecture, microservices-based ecosystems, REST API integrations, CI/CD pipelines, cloud-native engineering practices, and engineering excellence. Strong background collaborating with backend, DevOps, and product teams to build secure, high-performance, and scalable digital platforms while mentoring engineers and driving technical strategy.

CORE COMPETENCIES AND ACHIEVEMENTS

Engineering Leadership | System Architecture| AI Agents and Automation | Digital Innovation

- **Team Leadership & Mentorship:** Managing and mentoring cross-functional squads (Frontend, Mobile, Backend, QA) to ensure high-quality delivery**.**
- **Frontend & Mobile Architecture:** Designing scalable web and mobile applications using Clean Architecture, MonoRepo structures, React and Next.js.
- **Project Delivery & Collaboration:** Partnering seamlessly with Product and Design teams to translate requirements into visually appealing, user-friendly solutions.
- **AI Incubator Solutions:** Led technical scoping for AI solutions combining geospatial data, LLM-based analysis, intelligent recommendations, and automated feasibility assessment
- **Awards & Problem-Solving:** Winner of multiple national programming and innovation competitions (Aramco Wa'ed, KAUST, KFU).
- **B.A. Degree - Advanced Knowledge of Algorithms and Problem Solving.** Earned a B.A. Degree in Computer Science from King Faisal University, with honors by the college's Dean for my participation and achievements in winning multiple programming competitions.

PROFESSIONAL EXPERIENCE

Monshaat • Riyadh • Oct 2024 - Present
Engineering Leader • Full-time

- **Innovation Delivery:** Lead engineering efforts for startups and digital innovation initiatives, turning early-stage ideas into production-ready web and mobile products with a strong focus on scalability, maintainability, and product quality.
- **AI Initiative Delivery:** Lead the identification, assessment, and delivery of AI-enabled solutions for startups and government innovation programs, progressing use cases from initial discovery and prototyping to production readiness.
- **Technical Leadership:** Define technical direction, engineering standards, and delivery plans while working closely with Product, Design, Backend, QA, and DevOps teams to deliver secure, high-performing solutions.
- **Solution Architecture:** Review system architecture, microservices designs, REST API integrations, event-driven workflows, and cloud deployment strategies, collaborating with engineering teams on solutions leveraging PostgreSQL, Redis, Kafka, and Kubernetes.

Emkan • Riyadh • Jul 2022 - Oct 2024

Lead Software Engineer • Full-time

- **Application Architecture:** Led the architecture and development of scalable web and mobile applications using React, React Native, Next.js, and TypeScript, following Clean Architecture principles.
- **Platform Modernization:** Modernized core merchant platforms by improving user experience and collaborating with backend teams on REST APIs, microservices, and distributed systems supporting PostgreSQL, MySQL, Redis, and Kafka-based integrations, increasing customer satisfaction by **150%**.
- **System Integration:** Partnered with Backend and DevOps teams to deliver secure API integrations, CI/CD pipelines, containerized deployments, and cloud-native solutions using Docker.
- **Performance & Quality:** Improved application performance, monitoring, observability, accessibility, and engineering standards using Dynatrace and Countly while reducing technical debt and improving release quality.

Alrajhi Bank • Riyadh • Aug 2019 - Jul 2022

Senior Software Engineer • Full-time

- **Mobile Development:** Led the development of the Al Rajhi mobile application using React Native, JavaScript, Redux, and TypeScript, contributing to a **95%** positive user satisfaction rate and a **90%** increase in application downloads.
- **Product Collaboration:** Worked closely with Product Managers, UX/UI designers, backend engineers, and QA teams to deliver secure, customer-focused mobile banking experiences.
- **Frontend Architecture:** Established Clean Architecture, reusable component libraries, engineering standards, and code review practices to improve maintainability and application quality.
- **Backend Integration:** Integrated mobile applications with enterprise banking services through secure REST APIs and authentication workflows, collaborating with backend teams supporting PostgreSQL, Redis, Kafka, and enterprise payment systems (Sarie) to deliver reliable financial services.

AWARDS & CERTIFICATE

1st Place: Aramco's Wa'ed Programming Competition (100k Award).

2nd Place: KAUST Programming Competition (held by SAP).

CompTIA Security+ Certified.

ITIL Foundation Certificate in IT Service Management.

Software Engineer Certified from MISK Academy & General Assembly.
